RICOH	L	GR21 21mm F3.5	Yes

Notes

- \* A separately sold L-M conversion adapter is necessary when using the L Mount lens.
- \* When using the retractable lens, do not let the lens move in/out with the adapter attached.  
The camera and the lens may be damaged.
- \* This list of compatible lenses actually confirmed by Fujifilm is provided for your reference.  
Since the lens may be deteriorated due to individual difference or aging, or its form may have been changed due to damage, usability of all lenses of the same type is not guaranteed.  
Please make your own judgments when actually attaching the M Mount lens.
